-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Please note claims 58-62, 70 and 75-77 are considered generic claims, thus they are included in both groups:

Group 1, claim(s) 58-70 and 75-77, drawn to process for producing ethanol comprising treating distillers grain with a fatty acid oxidizing enzyme, and then further recovering starch from the treated grains and further treating the starch. Claims 63-69 specifically recite the unique steps of recovering and treating starch.

Group 2, claim(s) 58-62 and 70-77, drawn to a process for producing ethanol comprising treating distillers grain with a fatty acid oxidizing enzyme, and then further recovering a protein from the treated grains and further treating the protein. Claims 71-74 specifically recite the unique steps of recovering and treating protein.

The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claim 58, at least, is anticipated by Grichko (US 2004/0253696). Grichko disclose fermentation processes, including fermentation of grains by yeast, wherein the grains are treated with fatty acid oxidizing enzymes (See Grichko, paragraphs 0015-0016 and 0026-0038).

Therefore the special technical feature which links Groups 1 and 2, the generic process of producing ethanol involving treatment of grains with a fatty acid oxidizing enzyme, does not provide a contribution over the art, so unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
